RRISK

REDUCE RISK INCREASE STUDENT KNOWLEDGE

RRISK Seminar at SCU - Wednesday 20th November, 2019

On Wednesday 20th November, all students in year 10 & 11 will be travelling to SCU in Lismore to attend the RRISK Seminar at Southern Cross University. The students will be depart school at 9.10am and return before the afternoon buses. This excursion is compulsory due to the fact that the seminar covers important topics that we believe these students need to hear. There will be no classes on at school for year 10 and year 11 and the school we cover the cost.

The Reduce Risk Increase Student Knowledge (RRISK) Program aims to reduce risk-taking behaviour associated with alcohol and drug use, driving and partying among senior students in northern NSW. Attending RRISK extends the school based drug education and road safety curriculum by providing opportunities for senior high school students to further develop knowledge, attitudes and skills to reduce risk taking and develop safer celebrating strategies.

Students will need to bring morning team and lunch for the day. Facilities are also available topurchase food and drinks if necessary.

Students are to wear their **school uniform** for the day.

REDUCE RISK INCREASE STUDENT KNOWLEDGE

Young People and Risk Taking

Risk-taking is an essential part of learning and personal development for young people. It is a normal part of becoming an independent young adult[1].

Unfortunately, the risk involved in different activities and settings can often be poorly judged by young people and they are over represented in every category of risk-taking resulting in injury and trauma.

The Reduce Risk Increase Student Knowledge (RRISK) Program aims to reduce risk-taking behaviour associated with alcohol and drug use, driving and partying among year 11 students in northern NSW. Attending RRISK extends the school based drug education and road safety curriculum by providing opportunities for senior high school students to further develop knowledge, attitudes and skills to reduce risk taking and develop safer celebrating strategies.

Over 2,300 students from Grafton to Tweed Heads have registered to attend one of the 5 RRISK Seminars in 2019. If you have a year 11 student in your family, please encourage them to attend.

Research conducted by the George Institute in 2009 indicated that young people who participated in RRISK had a 44% less chance of being involved in a car crash compared to those who did not attend.

Look for information about the RRISK Program in this newsletter over the coming weeks.

ART CLUB

Art Club is back in term 4, 2019! Art Club is a fantastic opportunity for those students who are interested in Art to further develop their knowledge and skills.

Art Club will be on during Lunchtime on Fridays every week in D9 (Art Room).

This term we will be learning super-realistic portrait drawing skills!

FREE PARENTING COURSE

FOUR DAYS THAT COULD POSITIVELY CHANGE YOUR RELATIONSHIPS

THE NUTURED HEART APPROACH®

Created by psychologist and parent, Howard Glasser, the Nurtured Heart Approach is a relational method founded strategically in The 3 Stands™ which awakens greatness and inspires successful behavior in children. It has become a powerful way of bringing Inner Wealth® to all children, including those who are challenged behaviorally, socially, & academically, while facilitating parenting and classroom success.

HEAD-START
APPLY NOW

APPLICATIONS EXTENDED UNTIL
19 OCTOBER 2019

Applications for Head-Start have been **extended and now close 19 October.** Students who are currently in Year 10 or 11 are encouraged to apply now to start in March 2020.

On completion of the program and Year 12 studies, students will have a guaranteed offer into a Southern Cross University degree (excluding Education degrees).

Units available to study:

Students are required to attend campus one day per week for four hours in the afternoon from 2 March until 29 May with the exam period finishing 12 June.

Communication in Organisations
Offered at Lismore, Gold Coast and Coffs Harbour campuses (2 March - 12 June 2020).

This unit aims to provide the communication skills necessary for employment and academic study. Topics covered include public speaking and verbal reporting, intercultural communication, academic integrity and skills development in negotiation and persuasion.
The study program includes face-to-face tutorial and lectures.

Biology
Offered at Lismore, Gold Coast and National Marine Science Centre (Coffs Harbour) campuses
(2 March - 12 June 2020).

With a focus on cell structure, physio-chemical cellular responses, plant and animal physiology, structure and diversity, elementary genetics, population concepts, natural selection and evolution, this unit is ideal for those interested in developing their knowledge of the living world and scientific-practical skills and report writing.
This study program includes face-to-face lectures, tutorials and laboratory sessions.

Australian Legal System
Offered at Lismore and Gold Coast campuses (2 March - 12 June 2020).

Introduces students to the concept of law and to the Australian legal system. Discusses basic concepts such as federalism, parliamentary sovereignty, separation of powers, rule of law, statutory interpretation, the doctrine of precedent and procedural fairness. Explores issues related to Indigenous Australian peoples and to effective equality before the law for all Australians.
The student program includes face-to-face lectures and tutorials.

Visual Communication and Design
Offered at Lismore and Gold Coast campuses (2 March - 12 June 2020).

This unit introduces students to the principles of visual communication and design through the analysis and production of a range of digital media forms. Students acquire skills in image capture, creation and manipulation, and in layout and typography, and apply them using industry-standard software in response to design briefs.

Processes and Philosophy of Engineering
Offered at Lismore campus (2 March - 12 June 2020).

This unit focuses on the fundamental concepts of engineering process and philosophy. Skills in problem identification, concept formulation, critical and contextual thinking, project evaluation, process development and clear communication will be developed as students work in teams on a robotics project.
